### Profile

As an **accomplished software developer**, a successful career in this field is envisioned by me. **Further growth opportunities** and **challenging projects** are sought after, where my skills and expertise can be utilized to their **fullest potential**. Advancement and learning opportunities will be continuously pursued, to **contribute to the growth and success of the organization**.

### Projects

#### DU\_InterviewMaterial

Jan 2023 – Mar 2023

Developed a web application for **aptitude preparation** with **.Net core MVC** and **SQL** database that provides users with a range of **Aptitude questions, and access to practice tests, study materials, and tutorials**.

#### Happy Homedecor,Morbi

Mar 2022 – Apr 2022

Designed and developed a visually appealing home decor website using **ReactJS** and API integration with **PHP**. The website includes product categories, search functionality, detailed product descriptions, and a contact form.

#### Savior

Apr 2023

Road safety tool

Participated in hackathon arranged by Gateway Group of Companies at our college and developed a **.Net** tool in **30 hours**. That displays **records of past accidents** on map and **indicating danger zones**.

#### Student management

May 2023

Desktop Application

The project merges **ASP.NET** Core and **WPF** for frontend and backend. The backend employs a **.NET API with Entity Framework** for scalable development, a visually appealing UI, and simplified database access.

### Professional Experience

#### Teaching Assistant

Feb 2022 – Mar 2023 | Rajkot, India

Darshan University

Worked as a Teaching Assistant in my college, and got opportunity to improve technical skills in **Data Structure, OOP and Database management**. Also learnt **time management** and **communication skills** through this.
